Reference: LEAKCURE Project Funding Request

To Whom It May Concern,

The Jerusalem Water and Wastewater Works - Hagihon Ltd, supplies water to approximately 760,000 of Jerusalem's residents including the Jewish, Arab and Christian quarters in the Old City of Jerusalem in an area of approximately 32,500 acres, as well as to neighboring towns and villages.

The company is responsible for development, expansion, operating and maintenance of the water, sewage and drainage networks in Jerusalem, and this is in accordance with the city's growth and development plans.

The company is currently negotiating in earnest with Curapipe System Ltd. in connection with Curapipe's latest technology for in-site plugging of water pipeline leaks.

If the negotiations with Curapipe are fruitful we will consider field testing the technology in the coming months.

Yours sincerely,

David Kochmeister

CEO Hagihon Ltd
